

Praveen Kumar

Full Stack Engineer

PROFILE SUMMARY

- A results-driven Full Stack Developer with 10 years of experience in designing, developing, and deploying scalable web and mobile applications using JavaScript, React.js, React Native, Node.js, and Ruby on Rails. Experienced in building efficient, user-friendly interfaces and robust backend systems with RESTful APIs, database integrations, and optimized performance.
- Proficient in managing the entire software development lifecycle (SDLC) – from requirements analysis, system architecture, and UI/UX design to coding, debugging, documentation, and deployment. Adept at collaborating with cross-functional teams, translating business requirements into technical solutions, and ensuring timely project delivery with high quality.
- Recognized for strong analytical thinking, problem-solving skills, and a passion for continuous learning and innovation. I aim to contribute to dynamic and growth-oriented organizations by leveraging my technical expertise, creativity, and commitment to delivering impactful software solutions.

TECHNICAL SKILLS

- **Version Control Systems:** Git, GitLab.
- **CI/CD Tools:** GitHub Actions, Azure DevOps, AWS CodePipeline.
- **Web Technologies:** Reactjs, React Native, Angular, Nodejs, Ruby on rails, Tailwindcss, Bootstrap.
- **Database:** MySQL, PostgreSQL, MongoDB
- **Application Servers:** Apache, Tomcat, Nginx
- **Scripting Languages:** JavaScript
- **Operating Systems:** Linux, Windows, IIS
- **IDE & Tools** – VS Code
- **Ticketing & Documentation Tools:** Jira.

PROJECT DETAILS

Project Involved: Pinnacle Travel Group — Resort Booking System

Technologies: Reactjs, typescript, postgres

Description: A web-based booking system developed for Pinnacle Travel Group in Australia, designed for managing resort reservations and related services. The system allows users to search, view, and book resort accommodations and services. It handles inventory, availability, pricing, customer data, and payment processing in a streamlined, user-friendly interface.

Responsibilities:

- Designed and implemented the front-end UI/UX for the booking system, ensuring responsive design and seamless user interactions across devices.
- Built and integrated backend APIs to manage resort inventory, availability, pricing, and bookings.
- Integrated payment gateway(s) to securely process customer payments and refunds.
- Developed features for managing user accounts: booking history, profile management, and communication (e.g. confirmation emails).
- Created the admin dashboard to allow internal staff to manage resort listings, room/service offerings, booking statuses, and generate reports.
- Collaborated with stakeholders (business analysts, designers) to refine requirements and prioritize features.

Project Involved: Nestlé Health Science– PureInsight, PatientDirect & Rialto

Technologies: ReactJS, Elastic Search, Stripe

Description: A comprehensive digital platform was developed for Nestlé Health Science to support personalized nutrition and wellness based on user genomics. An e-commerce application for Patients to buy their prescriptions, which are assigned by Practitioners.

Responsibilities:

- Developed and maintained a responsive E-Commerce platform using React.js, ensuring seamless

Praveen Kumar

Full Stack Engineer

- Integrated **Stripe payment gateway** for secure online transactions, handling both one-time and recurring payments with proper error handling and validations.
- Implemented **product search and filtering** using **Elasticsearch**, optimizing data indexing and query performance for faster, accurate search results.
- Collaborated with backend developers to design and consume **RESTful APIs**, ensuring smooth communication between front-end and server.
- Built reusable UI components, managed global state with **React hooks / Context API / Redux** (adjust if applicable), and improved page load speed through code-splitting and lazy loading.
- Worked closely with designers and product teams to refine UI/UX and enhance the overall shopping experience.
- Deployed and monitored application performance, contributing to scalability and system optimization.

Project Involved: ShowDown Live

Technologies: React native, Firebase

Description: **Showdown Live** is an interactive game show platform inspired by YouTube, allowing users to **host and participate in live trivia games** across various categories.

Responsibilities:

- Developed the **Showdown Live** mobile application using **React Native**.
- Seamless, cross-platform experience for both iOS and Android users.
- Implemented real-time trivia gameplay with dynamic scoring logic, ensuring smooth performance and user engagement during live sessions.
- Designed and integrated intuitive **UI components** and navigation flows to enhance usability and user retention.
- Managed **state efficiently** using **Redux** improving data flow and app performance across multiple screens and modules.
- Integrated **reward and coin systems**, allowing users to earn and redeem coins for **gift cards** (Amazon, Walmart, Apple, Best Buy).
- Built **subscription and notification features**, enabling users to follow creators, get alerts for live games, and stay connected with friends in real time.

Praveen Kumar

Full Stack Engineer

- Collaborated with backend teams to consume and optimize **RESTful APIs**, ensuring robust and secure data communication.
- Worked closely with designers and product managers to refine UX, ensuring an engaging, game-show-like mobile experience.

Project Involved: DoctorDB

Technologies: Cordova, Angular, Ruby on Rails, MySql

Description: **DoctorDB** is a comprehensive healthcare discovery platform developed as both a web and mobile application for a Singapore-based IT company. The app helps users easily find and connect with top doctors, clinics, and hospitals based on their nearby locations.

Responsibilities:

- Developed for both **Web** and **Android, iOS** platforms, ensuring a consistent and responsive user experience..
- Built responsive **front-end interfaces** using **AngularJS**, ensuring smooth navigation and optimized performance across devices.
- .Implemented **internationalization (i18n)** to support **Malay language translation** throughout both web and mobile versions.
- Integrated **Google Maps API** for location-based search and recommendations of medical services.
- Developed **social sharing features** allowing users to recommend doctors and clinics via **Facebook** and **Google+ APIs**.
- Designed and implemented **rating and review functionalities** to enhance trust and engagement among users.
- Worked closely with backend teams to consume **RESTful APIs**, ensuring secure data flow and synchronization across platforms.
- Contributed to app deployment on **Android and iOS**, ensuring cross-platform compatibility and consistent user experience.

Praveen Kumar

Full Stack Engineer

Project Involved: Felicitas

Technologies: Ruby on Rails, Angularjs, PostgreSQL, Email Campaign APIs

Description: A web-based enterprise application developed for an industrial company in Singapore, designed to streamline task management, communication, and client relationship tracking.

Responsibilities:

- **Developed a** web-based task and CRM management platform **for an industrial company in Singapore, improving internal communication and task tracking efficiency.**
- **Implemented modules to** create, assign, and monitor tasks and notes **for all users, enabling better project visibility and accountability.**
- **Built features to** store and manage contact and company details, **supporting efficient data organization and retrieval.**
- **Integrated email campaign functionality** allowing administrators to create, send, and track campaign emails to contact companies.
- **Designed** intuitive **front-end components** ensuring a smooth user experience and responsive design across browsers.
- **Consumed and optimized** RESTful APIs **for secure and efficient data exchange between front-end and backend systems.**
- **Worked with backend developers to implement** reporting and analytics dashboards **for tracking user activities and campaign performance.**
- **Collaborated with stakeholders to** gather requirements, **prioritize features, and align deliverables with business goals.**
